

# ECO TIES

Made in the UK

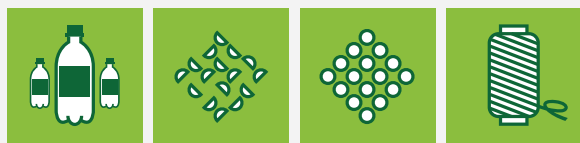

\*Depending on the size of the tie, each tie recycles 1 to 2 plastic bottles.

Making in the UK helps reduce your carbon footprint by 97% compared to ties manufactured in China.

Despatching 100 ties from China via air freight uses 29kg of CO2e compared to 0.004kg of CO2e made in the UK.

Compared to virgin polyester yarns, for every 1Kg of recycled yarn; energy consumption is 60% less, CO2 emissions 32% less and water consumption is 94% less. We aim to start filtering eco yarns into our stock range in 2020.

## HOW OUR ECO YARN IS MADE

- 1 POST CONSUMER PLASTIC BOTTLES COLLECTED
- 2 BOTTLES WASHED AND GRANULATED INTO FLEX (SMALL PIECES)
- 3 PROCESSED INTO PLASTIC CHIPS
- 4 MELTED AND SPUN INTO NEW POLYESTER YARNS READY FOR WEAVING
